Creative Producer and Developer

Digital creative capable of researching, designing and developing software, content, websites and more. Certifications in full-stack development and UX design, as well as a bachelors in digital communication. HTML/CSS, Javascript, Adobe Creative Cloud and more. My strengths include creative problem solving and multimedia content creation. Over 100 unique marketing websites designed and built.

Technical Skills

Languages: HTML/CSS, JavaScript, Python
Libraries: React.js, jQuery, Node.js, Express.js, Materialize.ui
Database: SQL, MongoDb, MySQL, Robo3t
Technologies: JIRA, Adobe Creative Suite, Github, WordPress, Adobe Experience Manager

Experience

Sesame Communications, Seattle | Digital Producer
Aug 2018 - Present
As a digital producer at Sesame Communications, I oversee the creation of custom websites from design to launch, managing scope, working with internal and external teams of designers, developers and content creators. I manage the schedules of designers, developers and copywriters to deliver high-quality products on time.

KEY ACHIEVEMENTS:
- Successfully launched over 200 custom websites
- Created custom video and text content for clients outside of project scope

MedBridge, Seattle | Multimedia Producer
Nov 2016 - July 2018
As a Producer at MedBridge, I produced educational multimedia content from filming to release. This included coordinating my team's schedule leveraging my technical skills to speed projects and creating custom content.

KEY ACHIEVEMENTS:
- Data Analyst and KPI Creator - I created KPI's for the production and development teams and created tools for pulling data from mostly qualitative work
- Content Creator - I researched, wrote and produced a series of short, educational videos to supplement the content library

Microsoft, Redmond | Video Production Intern
May 2015 - August 2016
As an Intern at Microsoft, I assisted various teams with multimedia productions. Productions included live-streaming of Microsoft CEO speeches, product education videos and virtual reality capture.

KEY ACHIEVEMENTS:
- Programmed over 50 virtual machines for in-store displays.

- Assisted in the development of virtual reality capture software and implementation
